NOTICE 14/2026

FLOOD CONTROL – DARLINGTON DAM OVERFLOW

Notice is hereby given to all Users along the Sundays River:

We have had excellent good rains in the catchment area of Darlington dam.

The dam level is currently at 57.56% and is overflowing. (61.2 m³/s)

Water will reach Korhaans Weir / Kirkwood soon and will spill into the Sundays River. It is not an emergency, but a precaution to make everybody aware of the increasing water velocity in the Sundays River.

Please be proactive to move all equipment away from the Sundays River banks

You will be informed of any new developments with regard to Darlington Dam and river levels

Thank you for your continued cooperation

MW PRIMMER
CHIEF EXECUTIVE OFFICER
